INSTALLATION/UPGRADE PERMIT

OFL 14108 **Date Issued 11/02/23**

Facility: **3474 - Littleton Hospital**
7700 S Broadway
Littleton, CO 80122
Arapahoe County

Dear Owner/Operator and Installation Contractor:

The Division of Oil and Public Safety (OPS) has reviewed and approved the attached application for the installation or upgrade of petroleum storage tank systems.

Colorado Petroleum Storage Tank Regulations require that an inspection of the storage tank systems and facility be performed before construction is completed and before the systems are placed in or returned to service.

Please contact the inspector identified below to arrange for an inspection, as well as the OPS office at 303-318-8538. Please call at least 3 working days before air is placed on underground piping or the construction is completed to allow enough time for an inspection to be scheduled.

Taylor - 303-728-4849

OPS Inspector: Monte McMechen - 303-728-4496

Please use the enclosed registration form to properly register a new tank/facility or amend information concerning an upgraded existing facility.

Rob - 303-378-6812

Thank you for your cooperation.

NOTE: CO Storage Tank Regulations 7 C.C.R. 1101-14 §2-2-8 (e)(1) requires that all UST secondary containment systems (tanks, piping, sumps, spill buckets, etc.) be tightness tested using an approved method at the time of installation, and again within thirty days of one year thereafter. All testing must be documented on the OPS *Secondary Containment / Spill Container Testing* form and submitted to OPS.

This permit is automatically revoked six months after the date of issue unless the Division of Oil and Public Safety grants an extension in writing. Also, six months or later after the date of issue, this permit may be modified by subsequent statutory or regulatory changes.

Effective January 1, 2009, all underground tanks and piping must be properly installed by OPS Certified UST Installers. For information on how to become an OPS Certified UST Installer, visit the OPS Website at http://colorado.gov/cdle/ops.

Underground Storage Tank System: ☑ Installation or ☐ Upgrade Application

A site plan (electronic or less than 11"x17") that includes the name and address of facility, lot dimensions and distances from tanks to the nearest important building, roads, railroads, property lines, dikes or impoundment areas, existing tanks and dispensers must accompany this application. We encourage you to submit this application by using [this link].
