TankID.io

Website Plan — v2

Full page definitions, image placement, and approved copy For approval before technical requirements are written

Scope	Two URLs: www.tankid.io (marketing homepage) and app.tankid.io (technician facility lookup — direct, no subdirec
Changes from v1	(1) app.tankid.io is the direct lookup page — no /lookup subdirectory. (2) No pricing anywhere — only early access
Total pages	8 pages defined across both domains.
Images ready	6 brand images assigned to specific placements. 2 field photos still needed.
After approval	Technical requirements document will be written against this plan.

SITE ARCHITECTURE

URL structure and page inventory.

TankID operates on two subdomains with distinct purposes and audiences. There is no pricing page. The only conversion action is early access registration.

URL	Page name	Primary audience	Purpose	Auth
www.tankid.io	Homepage	Facility owners, service companies	Marketing + early access registration	None
www.tankid.io/register	Early access registration	Facility owners, service companies	Full registration form — dedicated page version	None
www.tankid.io/about	About / FAQ	All audiences	Product explanation and FAQ — no pricing	None
www.tankid.io/thank-you	Registration thank you	New registrants	Post-registration confirmation with next steps	None
app.tankid.io	Facility lookup (direct)	Field technicians — primary	Manual lookup by state + facility number. QR scan destination. NO subdirectory.	None
app.tankid.io/facility/[FACILITY_NUM] | app.tankid.io/tank/[TANK_NUM]	Facility profile	Field technicians	Full tank profile — specs, chart, ATG, service history	None
app.tankid.io/not-found	Not enrolled	Field technicians	Error state — facility not in registry	None

■ NO PRICING anywhere on the site. The only conversion action is 'Get early access' → registration form. Pricing is discussed 1:1 during the onboarding call after registration.

■ PERFORMANCE NOTE: Current lookup time is approximately 20 seconds on LTE. The POC spec called for under 3 seconds. The 20-second figure is used in approved copy for now but is flagged as a priority technical improvement. Target: under 5 seconds before public launch.

IMAGE INVENTORY

Available brand images and assigned placements.

1B | WHAT IS TANKID + THE PROBLEM

Section: What is TankID? (light gray background)

WHAT IS TANKID — centered, max-width 860px Eyebrow + H2 + 2 body paragraphs + 2-column IS / IS NOT table

Eyebrow
"Overview"

H2
"What is TankID?"

Body paragraph 1
"TankID is the universal registry for above ground and underground storage tanks (ASTs and USTs). It is a cloud database with a mobile-first interface that stores, organizes, and makes instantly accessible the complete technical profile of every storage tank at a facility."

Body paragraph 2
"Whether you are a facility owner who needs your compliance calendar under control, or a field technician who just pulled up to an unfamiliar site — TankID puts every tank's critical data on your screen in seconds. Scan the QR label posted inside the facility, or look up by facility number at app.tankid.io. No phone calls. No paper filing cabinets. No waiting on hold."

TankID IS	TankID IS NOT
Data layer underneath ATG/compliance/service records • Instantly accessible — no app download • Secure document storage • Shared registry for owners, techs, service companies • Built for USTs and ASTs	ATG monitoring — does not replace Veeder-Root/Franklin • Compliance reporting platform • POS or fuel inventory system • Replacement for existing ATG software • Limited to underground tanks

Left column: blue background. Right column: light gray. Each bullet matches approved copy exactly.

Section: The problem (light background)

TEXT COLUMN (55%) Eyebrow + H2 + 3

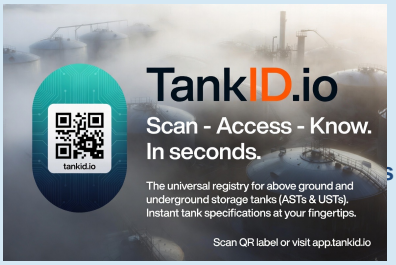

Image: TankID_Header2.jpeg Right column — foggy AST scene

Eyebrow
"The problem"

H2
"Every job starts with a question nobody can answer fast."

Body paragraph 1

"A technician pulls up to a site. They need to calibrate a probe, troubleshoot an ATG alarm, or complete an annual inspection. The first thing they need is the tank chart — the calibration table that tells them exactly how many gallons correspond to each inch of product level. Then the ATG configuration. Then the sensor map. Then the last service record."

Body paragraph 2

"None of that information is on the tank. It is not in the ATG. It is not on the owner's phone. It might be in a filing cabinet inside the office, in a PDF an install contractor emailed three years ago, or it might simply be gone. So the technician calls the manufacturer. Gets put on hold. Waits. Maybe gets a callback before end of day."

Body paragraph 3

"Meanwhile the job is stalled. The owner is frustrated. The technician moves on and comes back — or guesses."

Impact card: The tech

"Arrives on site without the data needed to start the job"

Impact card: The owner

"Has no idea what specs their own tanks are — until something goes wrong"

Impact card: The job

"Gets delayed, guessed at, or rescheduled — costing everyone time and money"

Resolution paragraph (below cards)

"TankID solves this with a scan. The QR label is posted inside the facility. The technician scans it — or types the facility number at app.tankid.io — and the full tank profile is on their screen in under 20 seconds."

■ **'20 seconds' is the current measured performance. Target is under 5 seconds before public launch. Update copy when performance improves.**

1C | FOR FACILITY OWNERS + FEATURES

Section: For facility owners — benefits grid

6-CARD BENEFITS GRID (2 rows × 3 cols) — white background Own your data | Compliance autopilot | Secure vault | Inspector-ready | Faster service | AST+UST

Eyebrow
"For facility owners"

H2
"What TankID does for your facility."

Section lead
"Facility owners bear the compliance burden and the liability. TankID gives them tools to stay ahead of both — without needing an IT department or a compliance consultant on retainer."

Benefit card: Own your data
"Your tank specs, charts, service history, and compliance records are yours — stored in one place, accessible any time. No more depending on your install contractor or manufacturer to have the only copy."

Benefit card: Compliance on autopilot
"Annual inspection dates, permit renewals, and certification deadlines are tracked automatically per tank. You get reminders before things are due — not citations after they are missed."

Benefit card: Ready for any inspector
"Your entire compliance record — inspections, service logs, certifications — is organized and retrievable in seconds. No scrambling before a regulatory visit."

Benefit card: Service records that stick
"Every time a technician logs a service call through TankID, you receive a summary automatically. The record is tied to the tank permanently — even if you change service companies."

Benefit card: Secure document vault
"Upload installation permits, manufacturer spec sheets, warranty docs, tank drawings, and certifications. Organized by tank. Accessible from anywhere, on any device."

Benefit card: Faster service calls
"When your technician already has the specs before they start, jobs get done faster with fewer return visits. Less downtime. Lower cost per call."

Benefit card: Covers ASTs and USTs
"Whether your tanks are above ground or underground, TankID manages them all in a single account. One dashboard. All your tanks."

Section: Features split (white background)

TEXT COLUMN (55%) Eyebrow + H2 + lead + 8 bullet list

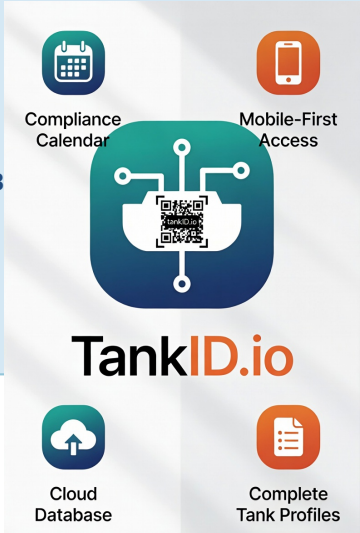

Image: tankid_logo_6.jpg (portrait) Right column — feature grid visual

Eyebrow
"Product features"

H2
"What TankID stores and delivers."

Section lead
"Every tank registered in TankID carries a full technical and compliance dossier, instantly accessible by authorized users — from the owner's dashboard to the technician's phone."

Data row: Identity
"Serial number, manufacturer, model, year manufactured, capacity (gallons)"

Data row: Physical specs
"Diameter, length, wall construction (single/double wall, fiberglass/steel), jacket type, AST or UST designation"

Data row: Installation
"Date installed, install contractor, installation depth, burial orientation, backfill type"

Data row: Tank chart
"Full calibration table (gallons per inch at actual installation depth) — the most time-consuming data for techs to locate"

Data row: ATG / sensor config
"ATG brand and model, probe type, sensor locations (interstitial, sump, dispenser), last calibration date"

Data row: Compliance record
"State registration number, last annual inspection date, next due date, inspector of record, test results history"

Data row: Service history
"Every service call: who, when, what was done, parts replaced, findings"

Data row: Documents
"Installation permits, spec sheets, warranty docs, state notifications, tank drawings — securely stored, instantly retrievable"

Secure vault subhead
"Secure document vault"

Vault intro
"TankID provides professional-grade, encrypted document storage tied to each tank's record. Upload and retrieve:"

Vault bullet
"Tank engineering drawings and schematics"

Vault bullet
"Tank charts and calibration tables"

Vault bullet
"Manufacturer specification sheets and warranty documents"

Vault bullet
"Installation permits and state notifications"

Vault bullet
"Inspection reports and annual compliance certifications"

Vault bullet
"Photos from service calls"

1D | HOW IT WORKS + TECH BAND + QR + AUDIENCE + SIGNUP

Section: How it works (dark background #111827)

DARK BACKGROUND — 4 step cards 2×2 grid Step number (orange) + title + description

Eyebrow
"How it works"

H2 (white)
"Set up in an afternoon. Value from day one."

For facility owners — 5 steps:

Owner step 01
"Create your TankID account and enter your facility address."

Owner step 02
"Upload installation permit PDFs — our AI agent extracts all tank specs automatically. Or enter manually if you have no digital records."

Owner step 03
"TankID ships a weatherproof QR label for your facility. Post it in a visible location inside — office wall, pump room door, or utility area."

Owner step 04
"Invite your service companies — or set tanks to open access for any licensed technician."

Owner step 05
"Your compliance calendar goes live: inspection dates, permit renewals, and certification deadlines tracked per tank, automatically."

For field technicians — 5 steps:

Tech step 01
"Arrive on site. Open TankID.io on your phone — no app download, no account required."

Tech step 02
"Scan the QR label posted inside the facility, OR go to app.tankid.io — select your state, enter the facility number. Full profile in under 20 seconds."

Tech step 03
"View the full tank chart, ATG configuration, sensor map, and complete service history."

Tech step 04
"Complete your work, then tap 'Log Service Call' to record findings, parts, photos, and test results."

Tech step 05
"The facility owner receives an automatic service summary and the compliance record updates."

Section: Technician lookup band (orange full-width)

ORANGE FULL-WIDTH BAND — H2 + body + URL badge + CTA button

H2 (white)
"Field technicians — your lookup is here."

Body (white)
"No account. No registration. Select your state, enter the facility number, and you have the full tank profile in under 20 seconds. Works on any phone."

URL badge (large centered)
"app.tankid.io"

Button
"Look up a facility now →"

Fine print
"No app download required. Works on any smartphone browser."

Section: QR label showcase

TEXT COLUMN (55%) Eyebrow + H2 specs

Image: QR_code_facility_1643.png Caption: 'Sample: Facility 1643'

H2
"The TankID QR label."

Body
"Every registered facility receives a weatherproof QR label. Post it inside the facility — on the office wall, pump room door, or utility area. Scan it on arrival for the full tank profile in under 20 seconds. No app needed."

Section: Audience cards (3-column, NO pricing)

3-COLUMN AUDIENCE CARDS — Facility Owners | Field Technicians | Service Companies NO price shown — replaced with access description

Card: Facility owners
"Subtitle: Independent gas stations, fleets, marinas, farms, industrial facilities | Body: Own your tank data. Stay ahead of compliance. Service records that never get lost. | CTA: Register for early access →"

Card: Field technicians
"Subtitle: UST & AST service techs dispatched to unfamiliar sites | Body: Scan the label inside the facility or look up at app.tankid.io — full profile before you lift a cover. | CTA: Look up a facility now →"

Card: Service companies
"Subtitle: Environmental and petroleum UST/AST contractors | Body: Techs arrive prepared. Lookup on arrival. Service logs on departure. Compliance docs auto-drafted. | CTA: Register your company →"

■ **NO PRICING on audience cards. Each card ends with an action CTA that links to the registration form.**

Section: Early access signup form (anchor: #signup)

"First name + Last name (2 cols, required)"

Form field
"Work email (required)"

Form field
"Company or facility name (required)"

Form field
"Role toggle: Facility owner / Field technician / Service company (required)"

Form field
"State dropdown (required)"

Form field
"Number of tanks: 1–3 / 4–10 / 11–50 / 50+ (optional)"

Submit button
"Request early access →"

Success state
"You're on the list. Thanks! We'll reach out within one business day to get you set up."

Fine print
"No credit card required. We'll contact you within 1 business day."

2 app.tankid.io — Facility Lookup (Direct)

Page definition | Image placement | Approved copy

2 | app.tankid.io — TECHNICIAN LOOKUP TOOL

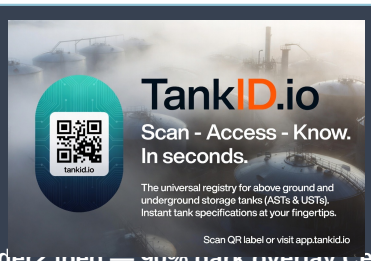
IMPORTANT: app.tankid.io IS the lookup page — no /lookup subdirectory. This URL is already live and working. Facility profiles: app.tankid.io/facility/[FACILITY_NUM]. Tank profiles: app.tankid.io/tank/[TANK_NUM]. QR codes on labels encode the direct tank URL at label generation time.

Design intent

This page is a functional tool, not a marketing page. Dark, focused, mobile-first. A technician who just pulled up to a site needs to enter a facility number and tap one button. Nothing competes for attention. Target load time: under 2 seconds on LTE.

Page structure — top to bottom

LIGHTWEIGHT HEADER — 58px Wordmark (white text) | 'About TankID' link | 'Register a facility' button (orange)



MAIN AREA — full viewport height Background: TankID_Header2.jpeg — 90% dark overlay Centered lookup card — max-width 500px — glass effect

TankID_Header2.jpeg 90% dark overlay

FOOTER — minimal — '© 2025 TankID.io' left | 'Register a facility →' right

Lookup card contents

Eyebrow
"Technician lookup"

H1 (white, large)
"Find your tank specs."

Subhead (muted)
"Scan the QR label inside the facility, or enter the state and facility number below. No account required."

Scan path card
"■ Scan the QR label — Point your phone camera at the label posted inside the facility. No app needed."

Or divider
"or enter manually"

State dropdown
"All 50 states. Required."

Facility number input
"Numeric keyboard on mobile. Placeholder: 'e.g. 1643'. Enter key submits."

Submit button (orange, full width)
"Look up facility →"

No-account note
"No account or login required. If the facility is enrolled in TankID, the full tank profile will appear."

■ PERFORMANCE: Current load time ~20 seconds. Target <5 seconds. The form must be functional with JS disabled (server-side form handling). Background image loads after content — must not block rendering.

3 app.tankid.io/facility/[NUM] and /tank/[NUM] — Profile Pages

Page definition | Image placement | Approved copy

3 | TANK PROFILE — QR SCAN DESTINATION

Most performance-critical page in the site. Server-rendered HTML only. No images. No external fonts. High-contrast, fast-scanning layout. System fonts.

Header	TankID wordmark (text only). Facility name + address. Tank identifier. Product stored. Orange accent bar at top.
Identity block	Manufacturer | Model | Year | Capacity (gal) | AST or UST | Wall construction.
Installation block	Installation depth (inches) | Install date | Install contractor.
Tank chart — CRITICAL	Full gallons-per-inch table as HTML table. All rows. Scrollable. Large font. High contrast. THIS IS THE PRIMARY VALUE DELIVERY.
ATG configuration	ATG brand + model | Probe type | Sensor locations | Last calibration date.
Compliance record	State registration | Last inspection date | Next due date | Inspector of record.
Service history	Logged service calls — most recent first. Populated over time by technicians.
Footer	Last updated date | 'Report an error' link (pre-addressed to onboard@tankid.io) | TankID text.

Load time	Under 3 seconds target (currently ~20s — must be resolved before public launch)
Authentication	None — zero friction, open public access for enrolled facilities
Mobile	iPhone Safari + Android Chrome — no zoom or horizontal scroll required
Tank chart	HTML table only — not a PDF download, not an image
Error contact	Report an Error link always visible — incorrect data is a compliance liability
Multi-tank	Facility selector shown if more than 1 tank enrolled at the facility

4 Supporting Pages — Register, About, Thank You, Error

Page definition | Image placement | Approved copy

4A | www.tankid.io/register — EARLY ACCESS REGISTRATION

Dedicated full-page registration form. Same fields as homepage form plus 2 additional qualification fields. Linked from email outreach and homepage CTAs. NO pricing mentioned anywhere on this page.

Field	Required	Notes
First + last name	Required	Two fields side by side
Work email	Required	CRM entry — primary contact
Company or facility name	Required	Account identification
Role toggle	Required	Facility owner / Field technician / Service company
State	Required	All 50 states dropdown
Number of tanks	Optional	1–3 / 4–10 / 11–50 / 50+
How did you hear about TankID?	Optional	Jeff referral / LinkedIn / Web search / Other
Tell us about your tanks	Optional	Open text — gives context for onboarding call

■ **NO PRICING on this page. The CTA is 'Request early access'. Pricing is discussed in the follow-up call.**

4B | www.tankid.io/about — ABOUT + FAQ

Single-column editorial page. Clean layout. No full-bleed images. Indexed by search engines. NO pricing section.

What is TankID?	Product definition — UST/AST registry, what it stores, what it is not. Uses approved IS/IS NOT copy.
How does the QR label work?	Physical label inside facility → scan → profile in under 20 seconds. Manual lookup fallback at app.tankid
What data does TankID store?	Full list: identity, specs, installation, tank chart, ATG, compliance, service history, documents.
How does enrollment work?	Beta: white-glove email process to onboard@tankid.io. Links to enrollment guide PDF.
Who can see my tank data?	Owner controls access. Service company access model explained.
Is my data secure?	Encrypted at rest and in transit. No data sold or shared.
What if my facility is not enrolled?	Links to registration. Technicians will see 'not enrolled' state at app.tankid.io.
NO pricing FAQ	No 'How much does it cost?' section. Pricing discussed after registration.

4C | www.tankid.io/thank-you — POST-REGISTRATION

Headline	You're on the list.
Body	Thanks for your interest in TankID. We'll reach out within one business day to schedule a demo or start your onbo
Next step callout	While you wait: if you have installation permits, tank specs, or ATG documentation on hand, forward them to onbo
Secondary	Technicians: look up any enrolled facility at app.tankid.io right now — no account needed.
Social prompt	Follow TankID.io on LinkedIn for product updates and field service tips.

4D | app.tankid.io/not-found — FACILITY NOT ENROLLED

Icon	Large orange icon — not a generic 404 symbol
Headline	Facility not found.
Body	No facility matching that number is enrolled in TankID in [State]. Double-check the number printed on the QR labe
Primary action	Try a different facility number — shows form again
Secondary action	'Is this your facility? Register it at tankid.io' — links to /register
Tertiary	'Email onboard@tankid.io if this facility should be in the registry'
Note	TankID is currently in beta. Not all facilities are enrolled yet.

5 Shared Components + Design System

Page definition | Image placement | Approved copy

GLOBAL NAV — www.tankid.io (sticky)

Logo	TankID_Logo2.jpeg — 30px height — links to www.tankid.io
Link 1	How it works — anchors to #how on homepage
Link 2	For facilities — anchors to #owners on homepage
Link 3	For technicians — anchors to #techs on homepage
NO pricing link	Pricing link removed — not included anywhere
Technician CTA	■ Look up a facility — ORANGE OUTLINED BUTTON — links to app.tankid.io — NEVER HIDDEN ON MOBILE
Owner CTA	Get early access — SOLID BLUE — links to #signup or /register
Mobile	Hamburger for links. BOTH CTAs always visible at every breakpoint.
Scroll	Transparent over hero → white + blue bottom border on scroll.

GLOBAL FOOTER — www.tankid.io

FOOTER — dark background #111827 Wordmark text left | Links: Facility lookup · Privacy · Terms · Contact | Copyright full-width bottom

Contact link: mailto:casey@tankid.io — NO phone number.

Mid gray	#4B5563	Body text, secondary copy
Light blue	#D5E8F4	Card backgrounds, alternate table rows
Light orange	#FDE8DB	Tech card bg, error states
Light green	#E1F5EE	Service company card, success states

OPEN ITEMS FOR REVIEW

Questions requiring a decision before technical requirements are written.

Q1

Performance — 20-second lookup

Current lookup time is ~20 seconds. Copy has been updated to say 'under 20 seconds' but this needs to become 'under 5 seconds' before launch. What is the root cause — cold start on Fly.io, unoptimized query, or something else? This should be resolved before technical requirements are finalized.

Q2

app.tankid.io URL structure confirmation

Confirmed: app.tankid.io is the direct lookup page (not /lookup). Confirmed patterns: facility profiles at app.tankid.io/facility/[FACILITY_NUM], tank profiles at app.tankid.io/tank/[TANK_NUM]. QR codes encode the direct tank URL. Please confirm these are final.

Q3

Casey's last name

Casey's Google Workspace last name has not been finalized. Needs to be set before casey@tankid.io appears in any website copy, email signatures, or contact information.

Q4

Tank profile — authentication

Currently: zero auth on tank profile pages (public for enrolled facilities). Is this correct? Or should there be a lightweight access mechanism such as a facility PIN?

Q5

Field photography needed

Two images are marked 'needed' — a real tank nameplate photo and an ATG cabinet photo. These require a field session at an enrolled facility. Jeff's POC sites are the natural opportunity. When can this happen?

Q6

About page at launch or Phase 2?

Can the /about page be deferred? The homepage FAQ section may be sufficient for beta. Confirming this reduces launch scope.

Q7

Email capture before lookup?

Should app.tankid.io optionally capture an email address before showing the tank profile? This would provide lead data from technicians. Or is zero-friction more important at this stage?

Q8

Service call logging

Step 04 in the technician flow says 'tap Log Service Call'. Is this feature live in the current version, or is it a future feature being described for marketing purposes? Copy should only describe what is actually available.

Ready to approve?

Reply with comments, corrections, or approval to:

casey@tankid.io

Technical requirements will be written against this approved plan.

TankID.io Website Plan v2 | Draft for Approval | April 2025
